STRUCTURAL SQUARE AND RECTANGULAR TUBING

Formed structural steel tubing is one of the most versatile forms of structural steel. All sizes smaller than 2" square and equivalent rectangles with wall thickness less than .120 are manufactured to ASTM A-513. Sizes 2" and above with wall thicknesses of .120 and heavier are manufactured to ASTM A-500.

Stocked sizes range from 1 1/2" through 16" square and equivalent rectangles!

Structural Square and Rectangular Tubing. Full range of sizes in stock. We cut to your specifications.
